THE OLD ATTIC RCOM.

I remember the dear old atte room,
Where I slept when a little boy,
In the farm-house over hes de the hill,
When his was a perfect Joy.
I remember the chairs so old and quaint,
And the bed whereon I slept.
And the chest of drawers beside the door,
Where the apples were always kept.

I remember well how the early sun.
Through the window small would stray,
And how the fard in the tree outside.
Would wardle his morning lay.
And how my mother's "Time to get up!"
On my heedless car would fail.
And the unprefentious print that hung.
So crookedly on the wal!.

I remember the celling cracked and low, Where bunches of peppers hung, And the old green curtain that wouldn't roll

up.
But in every wild breeze awing.
I remember the barrels with stove-pipes filled.
And various other things.
And the memory of this dear old room
Remembrances also brings.

Of the nights I had of innocent rest:
What wouldn't I give to be
Again, in the rost, boyhood dreams,
A wanderer happy and free?
And on its carpetiess floor to romp,
A merry and boisterous boy,
Am see my little slater play
With her batest painted toy?

The room was not far to look open.
But to me 'twas a jolly nest.
Ab, that now as then I could lay me down,
Its tired and willing guest.
And dream the dreames that then I dreampt
In the nights so cold and still.
On the homely bed in that attle room.

Among these features so rapidly passing away none was more constantly a part of the seene, and none more characteristic and not words, than the flat-bottomed, heavy-looking, stern-wheel propeller—the true planer in the West of civilization when as yet railways were not free planer in the spallow were not. Creeping up the shallow waters of some stream hardly broader than the steamer itself, erashing through the overhanging branches, shooting than the steamer itself, crashing through the growth is badly scattered, leaving vacancies where the grain has failed to come up at all.

Our railroad is no longer a myth but an active reality that gives excursions just like railroads of larger growth and although like Tempson's brook, "It winds in and out, it still goes on" to Howell!

Quite a number from this neighborhood attended the dedication of the new Baptist church at Pembroke on the 19th. Dr. Eaton preached just such a steamer. Now the railways have driven it away far northward and westward, north as far as the Saskatche-wan and the Peace River and west as far as the smaller tributaries of the

Yellowstone and the Missouri.

During the summer of 1870, we wil. say, one of these steamers was making its way down the Red River of the North for Fargo. In design and ap-pearance it was of the usual Western type. And the Red River is of the same general order as most streams the West-a shallow zigzag of the West—a shallow zigzag of a stream, apparently going nowhere in particular, but, for all that, in its own leisurely fashion, knowing its own business very well as it heads northward for Lake Winnepeg, now wide, now narrow, with here a buff of poplar or oak upon its banks, and there a belt of willow bending down into the yellow-brown waters, with a few solling the properties of a families at wide intervals tell tary for abantles at wide intervals tell. tary log shanties at wide intervals tell of the settler's presence.
